USER GUIDE

Content team

For: Content Editors and Content Publishers

Version of 26 October 2026

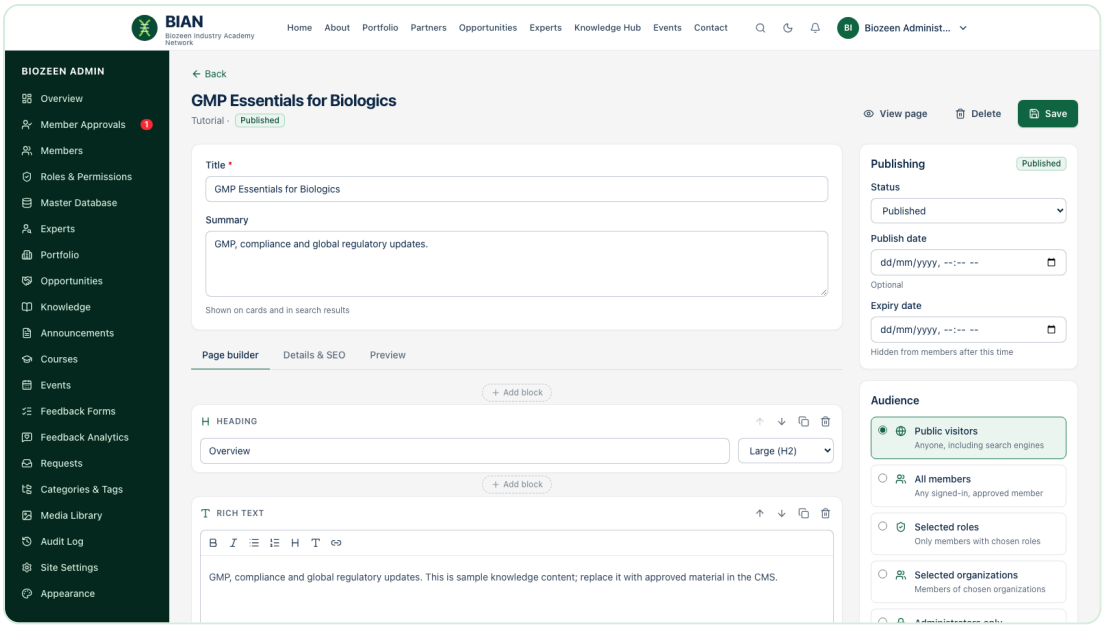

For: Content Editors (create and edit, then submit for review) and **Content Publishers** (also publish, schedule, archive and delete).

Who can do what

Action	Content Editor	Content Publisher
Create and edit portfolio pages, opportunities, knowledge resources, announcements, courses and events	✓	✓
Upload media	✓	✓
Save as *Draft* or *Pending review*	✓	✓
Publish, schedule, unpublish, archive	—	✓
Delete	—	✓
Build feedback forms and view analytics	✓	✓

Publishers get a notification whenever a member or an editor submits something for review.

Create a page

The page builder

1. Choose the section in the sidebar (**Portfolio**, **Opportunities**, **Knowledge** or **Announcements**) and click **New**.
2. Enter the **title** and a **summary**. The summary appears on cards and in search results.
3. **Page builder → Add block.** Build the page from blocks: heading, rich text, image, gallery, video, file download, columns, cards, list, table, FAQ, callout, call to action, quote, divider, related content and an inline feedback form. Use the **Move up** / **Move down** arrows to reorder, or remove a block.
4. **Details & SEO:** type-specific fields (for opportunities: organisation, type, location, deadline, apply link; for knowledge: section), the featured image, categories and tags, and SEO text.
5. **Audience:** *Public visitors*, *All members*, *Selected roles* (for example Students only), *Selected organisations*, or *Administrators only*.
6. **Publishing:** set the status. Editors choose *Draft* or *Pending review*. Publishers can also choose *Published*, or *Scheduled* with a publish date. An optional **expiry date** hides the item automatically.
7. Check the **Preview** tab, then **Save**.

Files attached to a page can be downloaded only by people who can see that page.

Review and publish (publishers)

1. Open the item from its notification, or filter the list by *Pending review*.
2. Edit if needed, check the audience, and set the status to **Published** (or *Scheduled*).
3. Save. A member who submitted it is notified that it is live. For announcements, opportunities and events, **everyone in the audience is notified**, so check the audience before publishing.

Courses

Courses → New course. Add the summary, objectives, thumbnail and audience. Then add **modules** and **lessons**. Each lesson opens the same page builder. Attach a course-level or lesson-level feedback form if you want ratings.

Events

Events → New event. Set the type, start and end, format (in person, online, hybrid), venue or meeting link, and registration (capacity, deadline, or an external link). The meeting link is shown only to registered attendees. The **Registrations** tab lists sign-ups.

Feedback forms

Feedback Forms → New form. Add star ratings, a 0–10 recommendation, single or multiple choice, yes/no, and short or long text questions. Choose whether responses are identified, anonymous or the respondent's choice, and whether people can respond once or repeatedly. Attach the form to an item, or place it with a *feedback* block. Editing questions on a form that already has responses creates a new version, so earlier answers keep their original questions.

Things everyone can do

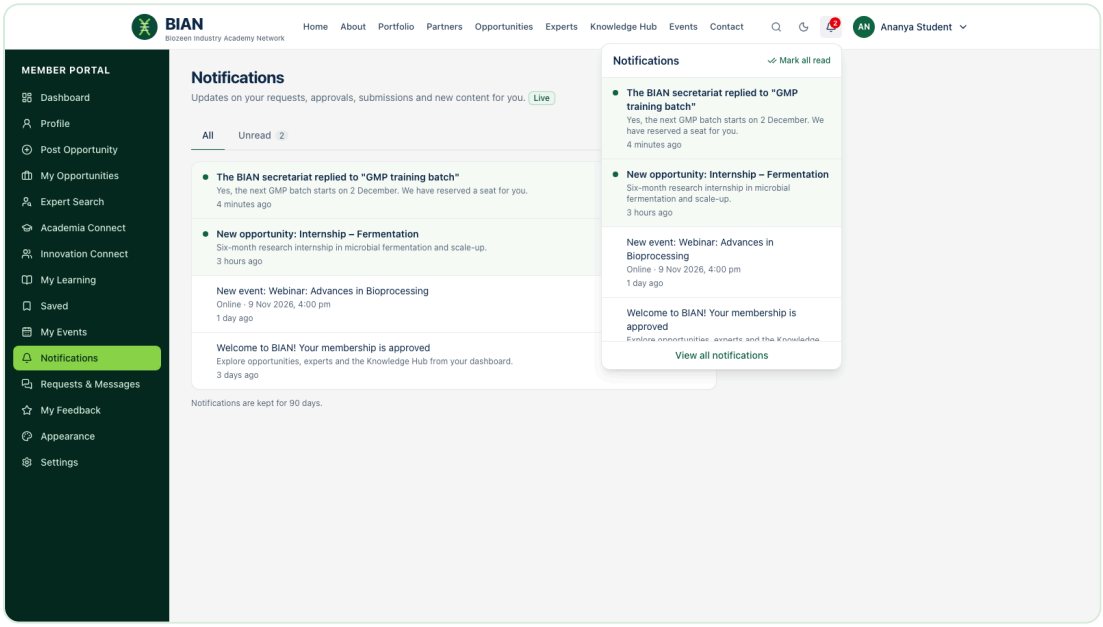

Sign in

1. Go to **Login** (top right) and enter your email and password. Tick **Remember me** on your own device to stay signed in for 30 days; otherwise you stay signed in for one day.
2. **If a sign-in code is asked for**, check your email for a 6-digit code and type it in. The code expires after 10 minutes. You can request a new one with **Resend code** (after 30 seconds). After 5 wrong codes, start again from the password step.
3. You land on your **Member Portal** (`/dashboard`), or on the **Admin workspace** (`/admin`) if you are staff.

Forgot your password? Use **Forgot Password?** on the login page. The emailed link is valid for one hour.

> Whether a sign-in code is required is set by your administrator. Until email is set up, the platform shows codes and links on screen in development only. Live sites must have email configured first.

Notifications

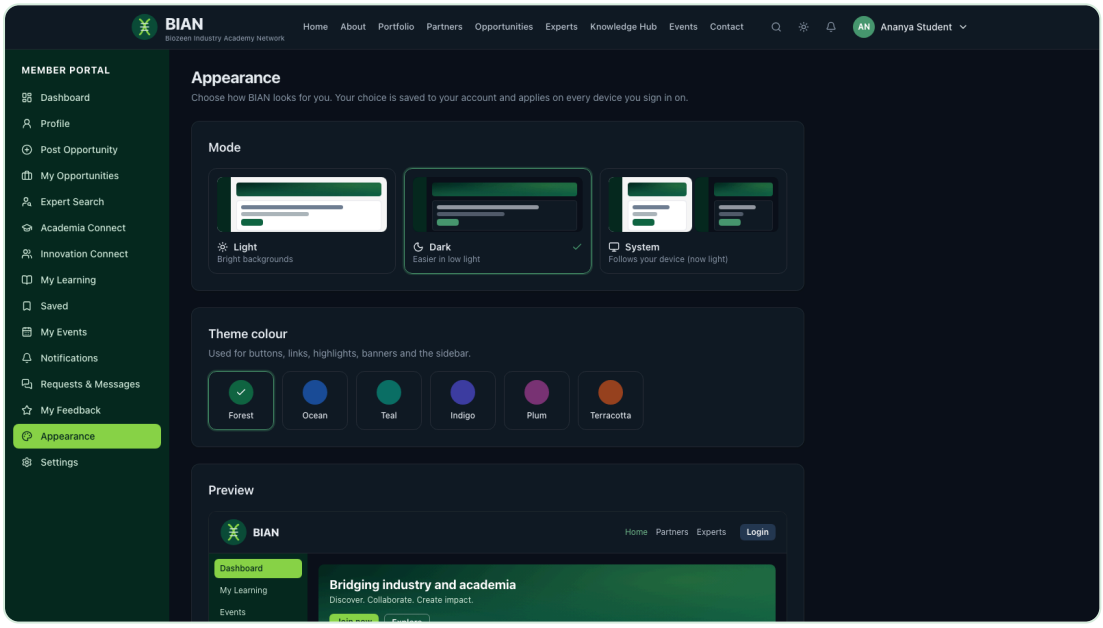

Notifications page with the bell menu open

The **bell** in the header shows how many unread notifications you have. They arrive live, without reloading the page, and also pop up briefly at the bottom of the screen.

- Click the bell to see the latest notifications. Click one to open the page it refers to; it is then marked as read.
- **Mark all read** clears the badge.
- **View all notifications** (or **Dashboard** → **Notifications**) shows the full list with an *Unread* filter. Notifications are kept for 90 days.

You are told when…	Who receives it
Your membership is approved	The new member
The secretariat replies to your request, or its status changes	The member who sent it
Your submitted opportunity is published	The member who submitted it
Your expert profile is approved	The expert
A new announcement, opportunity or event is published for you	Every member in that item's audience
Someone registers and awaits approval	Staff who approve members
A contact, collaboration or expert-connect request comes in	Staff who handle requests
A member submits an opportunity for review	Staff who can publish
A member creates an expert profile	Staff who manage experts

Appearance: theme colour and light/dark mode

Appearance settings in dark mode

Open **Dashboard** → **Appearance**, or **Appearance** in your account menu.

1. Choose a **mode**: *Light*, *Dark*, or *System* (follows your computer or phone).
2. Choose a **theme colour**: Forest (the BIAN default), Ocean, Teal, Indigo, Plum or Terracotta.
3. The **Preview** shows the header, banner, sidebar, cards, buttons and badges in your choice before you apply it.
4. Click **Apply theme**. Your choice is saved to your account and follows you to any device you sign in on. **Reset to default** returns to Forest with System mode.

The **moon/sun** button in the header switches between light and dark mode in one click. It works for visitors too and is remembered on that device.

Account settings

Dashboard → **Settings** lets you change your password (other devices are signed out) or **sign out of all devices**.

Category or role? Your *category* is what you chose when you registered (for example Student). Your *roles* decide what you can see and do. When you are approved you get the **Member** role plus the role for your category. An administrator can add or change roles later.
