USER GUIDE

Administrators

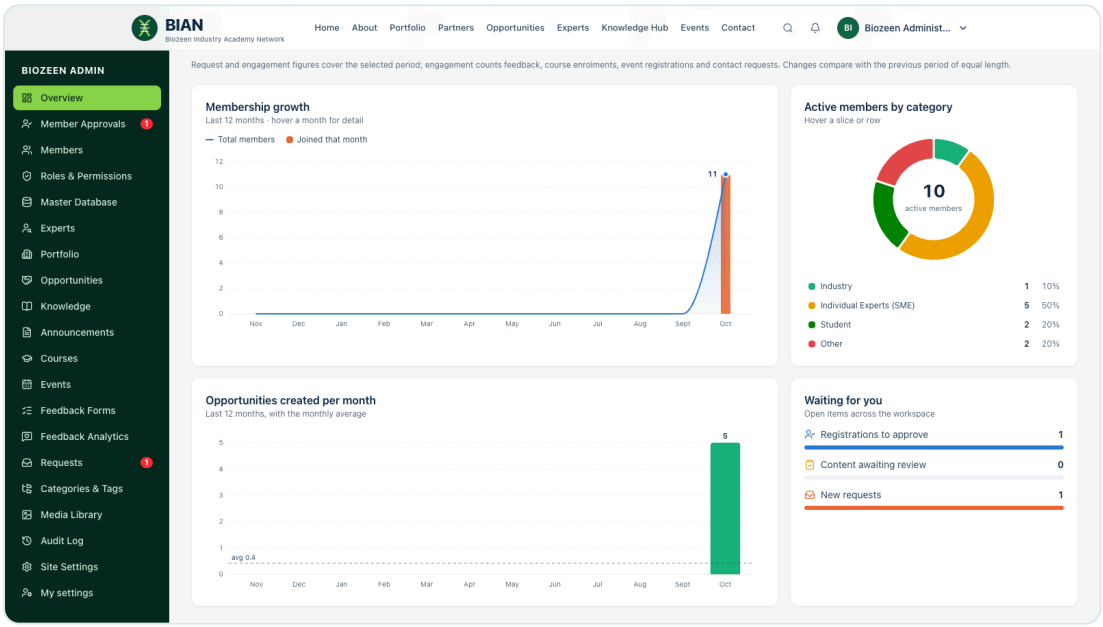

For: Biozeen Administrator role

Version of 26 October 2026

For: the **Biozeen Administrator** role, which has every permission. Content and membership staff with narrower roles have their own guides: content team and membership managers.

Sign in as usual; you land on the **Admin workspace** (`/admin`). You can switch to your own Member Portal from the account menu.

Overview dashboard

The admin overview

Live counts of members, organisations, experts and opportunities; collaboration and training requests; items awaiting action; and engagement (feedback, enrolments, event registrations, requests). Each count is compared with the previous period, and the member and opportunity tiles carry a 12-month trend line. Charts show membership growth (running total with members joined each month), active members by category (hover a slice or legend row) and opportunities per month with the monthly average. **Engagement by month** stacks feedback, course enrolments, event registrations and contact requests. **Request pipeline** shows requests received in the chosen period by type and stage (new, in progress, responded, closed),

with the median and average time until staff first act on a request. Hover any month or bar for exact figures. A **Waiting for you** panel links to pending approvals, content awaiting review and new requests. Choose the period (7 days to 12 months) at the top right.

The sidebar shows red badges for pending approvals, content awaiting review and new requests. These update without reloading, and the bell notifies you as items arrive.

Workspace map

Every list uses the same action icons at the end of each row: **View** (eye) opens the public page or a details panel, **Edit** (pencil) and **Delete** (bin, turns red on hover). An action you can't use stays greyed out; hover it to see why.

Area	What you do there
Member Approvals	Approve or reject registrations (see membership managers)
Members	Search, edit, suspend or re-activate members; change roles and category; export CSV
Roles & Permissions	Create roles and choose their permissions; see how many members hold each
Master Database · Experts	Organisation, expert and alumni directories with filters and CSV export
Portfolio · Opportunities · Knowledge · Announcements	The visual page builder (see content team)
Courses · Events	Course builder (modules, lessons) and events with registrations
Feedback Forms · Feedback Analytics	Build forms; analyse responses by item, course, lesson, member, date, rating and category
Requests	Contact, collaboration and expert-connect requests: status, assignment, internal notes, replies
Categories & Tags · Media Library	Taxonomy and uploaded files with access settings
Audit Log	Who changed what and when. Open an entry to see its full record as JSON, with a copy button
Site Settings	Homepage hero, keywords, intro video, secretariat email/phone/address
My settings	Your own appearance (theme colour, light/dark), password and devices

Roles and permissions

- **Roles & Permissions** → **New role**: name it and tick its permissions, for example *Content Publisher* with content.manage, content.publish, media.upload and feedback.view.

- Assigning roles that grant admin access requires the **roles.manage** permission. The platform always keeps at least one active Biozeen Administrator.
- Suspending a member ends their sessions and live connection immediately.

Handle requests

Requests lists every enquiry. Open one (or click its notification) to:

1. Set the **status**: new, in progress, responded or closed.
2. **Assign** it to a colleague.
3. Add **internal notes**. These are never shown to the requester.
4. Write a **reply**. The member sees it under *Requests & Messages* and is notified straight away.

Feedback analytics

Filter by date, content type, a specific item, form, minimum rating, member category and identified/anonymous. Tabs show the **Summary** (trend and distribution), **Courses & lessons** (lessons rated below 3 are flagged), individual **Responses**, and **By member**. *By member* is available only with the *view identified feedback* permission. Anonymous answers never reveal who sent them, even to you. **Export CSV** downloads the filtered responses.

Site settings

Change the homepage headline, highlight text, keywords and intro video, plus the secretariat's contact details. These appear in the footer and on the Contact page.

Platform configuration (for whoever runs the server)

These are set in `server/.env`. See the project README for the full list.

Setting	Effect
`EMAIL_ENABLED` + `SMTP_*` + `MAIL_FROM`	Sends verification, password-reset and sign-in-code emails. While `false`, emails are written to the server log
`LOGIN_OTP_ENABLED`	Requires an emailed 6-digit code after the password. Turn on only once email works
`REQUIRE_APPROVAL` · `REQUIRE_EMAIL_VERIFICATION`	Whether new members need approval and email verification
`AUTO_INIT_DB`	Fills an empty database from `db/data` on first start

Before going live

- Replace the sample organisations, experts, listings, events and announcements, and the placeholder text on the About and services pages.
- Change or remove the demo accounts and the default admin password.
- Configure email, then decide whether to enable sign-in codes.
- Review **Roles & Permissions** so that each staff member has only what they need.

Things everyone can do

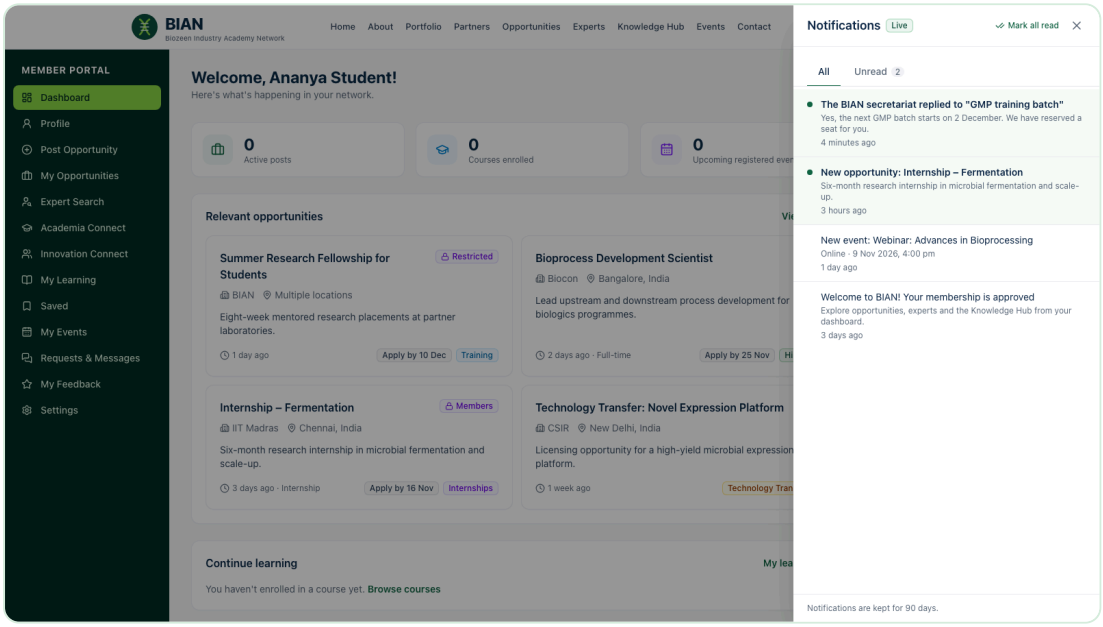

Sign in

1. Go to **Login** (top right) and enter your email and password. Tick **Remember me** on your own device to stay signed in for 30 days; otherwise you stay signed in for one day.
2. **If a sign-in code is asked for**, check your email for a 6-digit code and type it in. The code expires after 10 minutes. You can request a new one with **Resend code** (after 30 seconds). After 5 wrong codes, start again from the password step.
3. You land on your **Member Portal** (`/dashboard`), or on the **Admin workspace** (`/admin`) if you are staff.

Forgot your password? Use **Forgot Password?** on the login page. The emailed link is valid for one hour.

> Whether a sign-in code is required is set by your administrator. Until email is set up, the platform shows codes and links on screen in development only. Live sites must have email configured first.

Notifications

The notifications panel open on the right

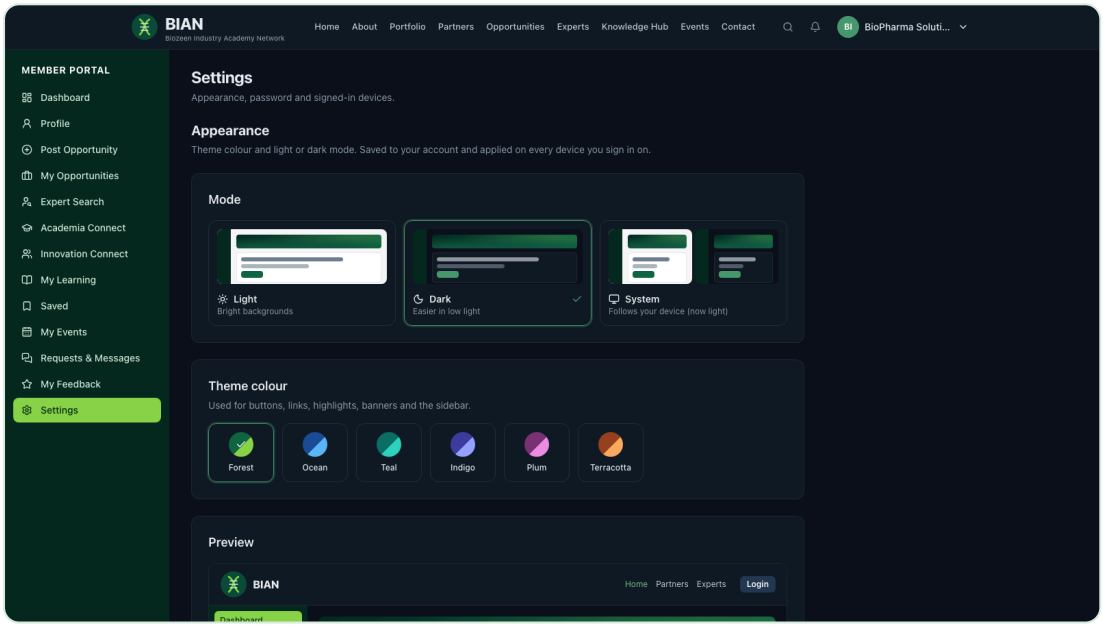

The **bell** in the header shows how many unread notifications you have. They arrive live, without reloading the page, and also pop up briefly at the bottom of the screen.

- Click the bell to open the **notifications panel** on the right. Switch between **All** and **Unread**.
- Click a notification to open the page it refers to; it is then marked as read.
- **Mark all read** clears the badge. Notifications are kept for 90 days.

You are told when…	Who receives it
Your membership is approved	The new member
The secretariat replies to your request, or its status changes	The member who sent it

You are told when…	Who receives it
Your submitted opportunity is published	The member who submitted it
Your expert profile is approved	The expert
A new announcement, opportunity or event is published for you	Every member in that item's audience
Someone registers and awaits approval	Staff who approve members
A contact, collaboration or expert-connect request comes in	Staff who handle requests
A member submits an opportunity for review	Staff who can publish
A member creates an expert profile	Staff who manage experts

Settings: appearance, password and devices

The Settings page with appearance options

Open **Settings** from your account menu (top right), or from the sidebar of your workspace.

Appearance

1. Choose a **mode**: *Light*, *Dark*, or *System* (follows your computer or phone).
2. Choose a **theme colour**: Forest (the BIAN default), Ocean, Teal, Indigo, Plum, Terracotta, or **Custom** (the last option) to pick any colour. With a custom colour, every shade is worked out from your pick, and very light colours are darkened so button text stays readable.
3. The **Preview** shows the header, banner, sidebar, cards, buttons and badges in your choice before you apply it.
4. Click **Apply theme**. Your choice is saved to your account and follows you to any device you sign in on. **Reset to default** returns to Forest with System mode.

Buttons, links, banners, the sidebar and highlights such as the selected menu item all follow the theme colour you choose. Visitors who aren't signed in keep their choice only until they close the browser tab.

Action icons use the same colours everywhere: **View** is blue, **Edit** amber, **Delete** red and **Analytics** violet.

Security: change your password (other devices are signed out), or **sign out of all devices**.

Category or role? Your *category* is what you chose when you registered (for example Student). Your *roles* decide what you can see and do. When you are approved you get the **Member** role plus the role for your category. An administrator can add or change roles later.
